

The Friendly PARTNER

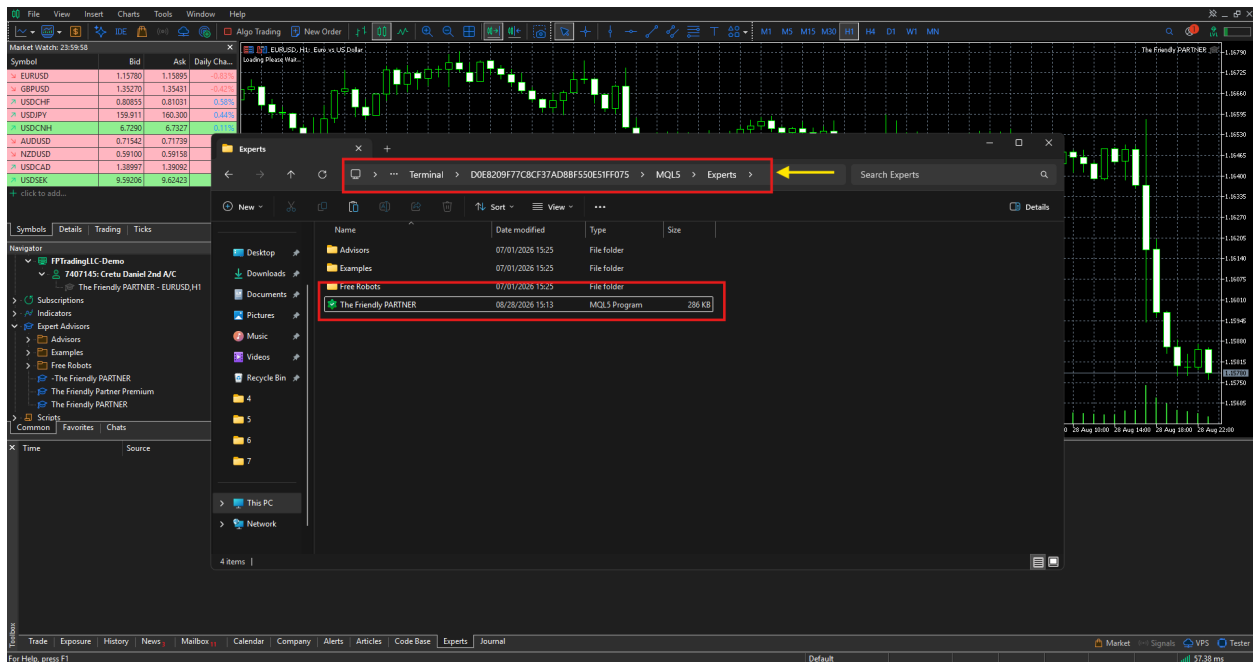

MT5 Expert Advisor — Installation Guide (.ex5)

1. Open MetaTrader 5.
2. At the top-left, click: **File** → **Open Data Folder**.

File menu — Open Data Folder

3. Open the folder: **MQL5** → **Experts**.
4. Copy your .ex5 EA file into the Experts folder.

MQL5 > Experts folder, showing the EA file placed inside it

5. Close the folder and return to MT5.

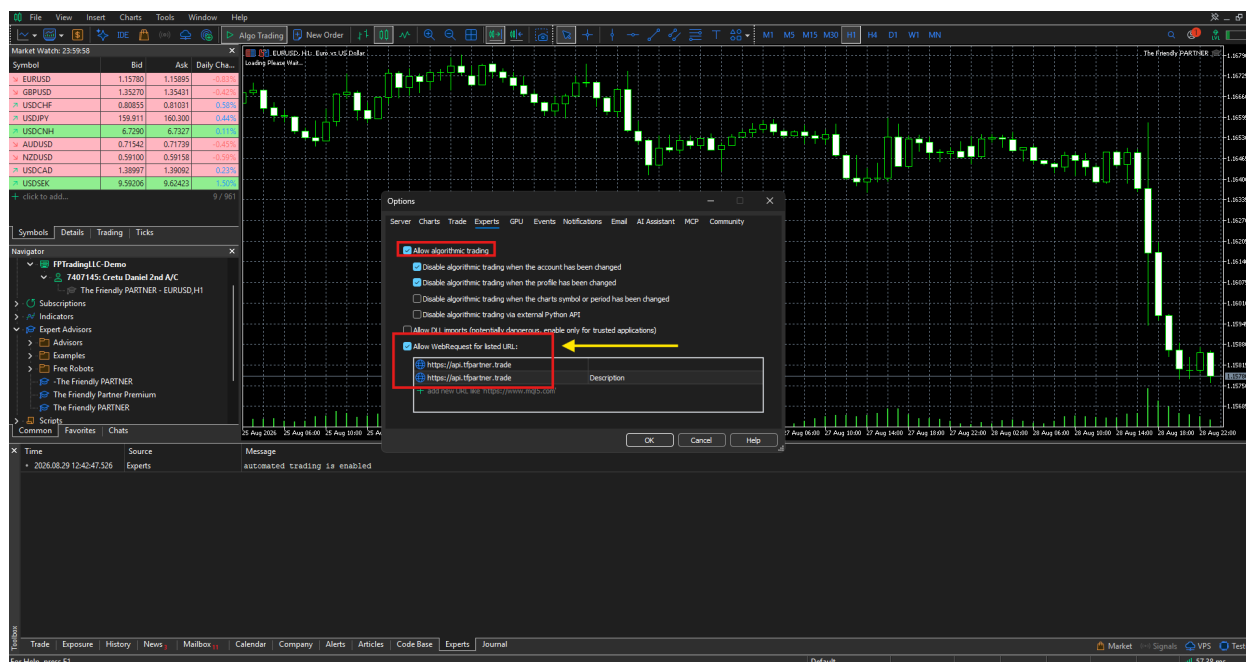

6. Go to Tools → Options, then the Expert Advisors tab.

7. Check Allow algorithmic trading at the top of the tab. This is the master switch for all Expert Advisors — without it, the EA will not trade even if every other setting is correct.

Top MT5 toolbar — Algo Trading button in the enabled (green) state

8. Check Allow WebRequest for listed URL, click Add, and enter <https://api.tfpartner.trade>. Click OK.

Options > Experts tab — both checkboxes checked, URL added

9. Open the Navigator panel: View → Navigator (or Ctrl+N).

View menu — Navigator

10. Find Expert Advisors, right-click, and select Refresh.

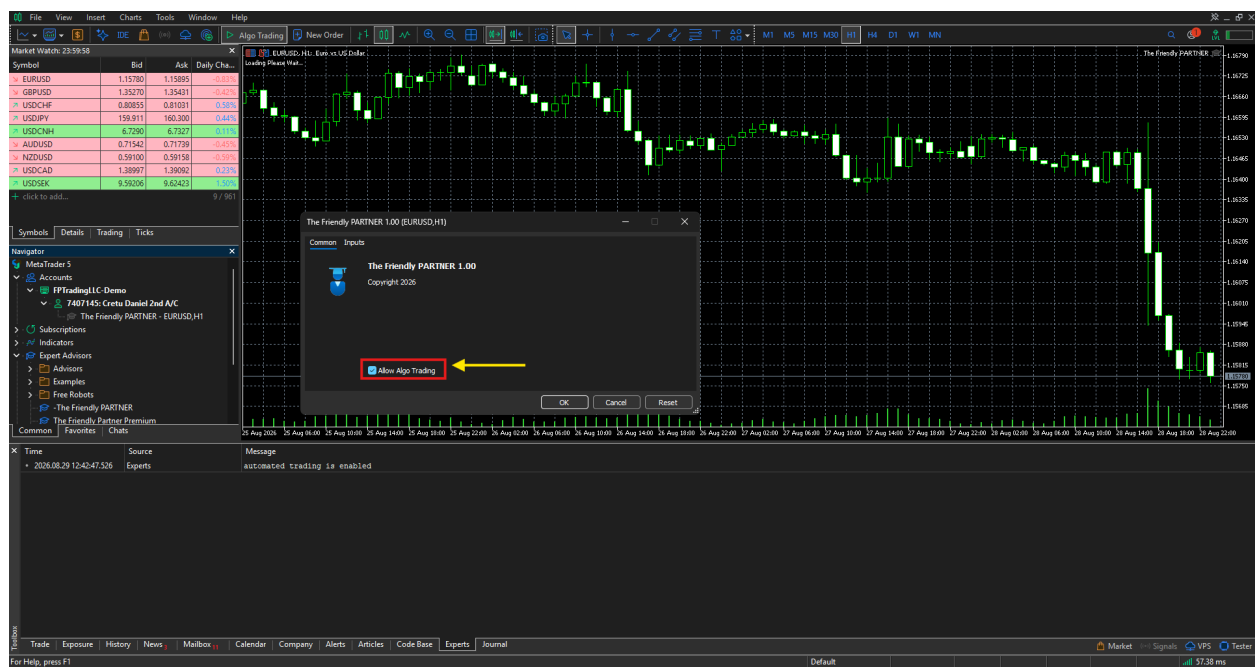

11. Find your EA in the list.

12. Open the chart for the instrument where you want to use the EA.

13. Drag the EA from Navigator onto the chart, or double-click on it.

14. In the EA window, open the Common tab.

15. Make sure Allow Algo Trading is enabled, then click OK.

EA properties > Common tab — Allow Algo Trading checked
